Delivering solutions.

The Integrated Logistics Group

DB Schenker combines all transport and logistics activities of Deutsche Bahn employing over 91,000 staff spread across about 2,000 locations in about 130 countries. With turnover of over 19 billion Euros, we are a leading company – both in Europe and worldwide.

DB Schenker is one of the leading globally integrated logistics service providers and has a leading goods transport rail network at its disposal. DB Schenker stands apart with its dense network of locations in the world's most important economic regions, in air and ocean transport, in European land transport, in contract logistics as well as in supply chain management. With this very special combination, we can provide quick and efficient solutions for the most varying of client requirements both with regard to trade and industry.

DB Schenker is for many companies a strong partner*:

- No. 1 in Europe in rail freight
- No. 1 in Europe in combined transport
- No. 1 in Europe in land transportation
- No. 2 worldwide in air freight
- No. 3 worldwide in ocean freight
- No. 6 in global contract logistics

* Business Report 2008

International markets grow together and outsourcing of complete service packages gains ground. As a result of such trends, not only does the requirement for transport increase, but also the demands placed upon partners. The liberalisation of European rail goods transport market has led to a rapid comeback, especially for transport providers.

DB Schenker in Australia and New Zealand

DB Schenker offers a complete range of logistics services in Australia and New Zealand as well as everywhere else on the globe. Services include road transport, warehousing concepts, value-added services, assembly services and quality control. DB Schenker's international network of offices connects the fifth continent with the rest of the world by air freight and ocean freight.

Schenker Australia Pty Ltd was founded 1962, today consisting of 1,100 employees. The company comprises of 12 locations in Australia and 2 locations in New Zealand, with total warehousing capacity exceeding 120,000 sqm.

DB SCHENKERocean – all aboard with DB Schenker

Due to decades of experience in the field of ocean going logistics, DB Schenker offers a comprehensive range of ocean freight products and services suitable for all cargo requirements. We determine the most efficient and cost-effective cargo solutions for your business.

DB SCHENKERocean – reliable, fast and flexible to and from main ports in Australia and New Zealand:

- Tailored multi-modal transport solutions
- Integrated pre-carriage & onwards carriage scheduling
- Defined departure & arrival times
- Optimum transit times
- Online tracking
- Competitive freight rates
- Experience in handling heavy & oversize cargo loads
- Expert contacts

DB SCHENKERcomplete FCL (Full Container Load)

We provide the optimum type of containers to suit the structure of your shipments. The goods are loaded and unloaded directly on site at your location. Tailored solutions for complete door-to-door transports.

DB SCHENKERcombine LCL (Less than Container Load)

Our door-to-door service collects your individual consignments and transports them to gateways. The shipments are transported and delivered in containers to ensure minimum transshipment and optimum loading conditions.

DB SCHENKERprojects

Intelligent solutions for highly complex products involving the transportation of extremely bulky and heavy shipments. We also select and organise all transport equipment.

High Level Capabilities In All Waters

As recognised leaders in ocean shipping, we uniquely combine local know-how and unrivalled personal customer service with global reach, global strength and global expertise.

Customs Clearance

DB Schenker is able to offer comprehensive Customs and Quarantine clearance for your import and export cargo. A critical component of the global supply chain, Customs brokerage services have never been more important. Our Customs Clearance team works hand in hand with our Freight Forwarding team ensuring prompt clearance and delivery of your cargo. Let us tailor a solution to your specific requirements today.

DB SCHENKERSky – the **fascination** of airfreight

With DB Schenker's time definite airfreight solutions, you are in charge of determining the pace and flexibility of your freight movement for all shapes and sizes. Your freight arrives at its destination not only at the required time, but also by the most economical route, complete with fast customs clearance and door-to-door deliveries - the choice is yours. With offices at all major airports in Australia and New Zealand, DB Schenker is ideally located to handle your business needs.

Tailored service packages to suit your specific needs:

DB SCHENKERjetcargo first
Express - for particularly urgent shipments. Transit time: 1-2 days*; daily uplift using first-class carriers. High speed - high quality

DB SCHENKERjetcargo business
Standard - for regular shipments. Transit time: 3-4 days.* Always perfectly timed

DB SCHENKERjetcargo economy
Low Budget - for shipments that are time flexible. Transit time: 5-6 days*; competitive rates. The economical alternative

DB SCHENKERjetcargo special

Offers a wide range of transport concepts for charter flights, on-board couriers and other special types of shipments for hazardous like substances, perishable goods and much, much more. Specifically tailored to meet your needs.

*Transit time from DB Schenker station to DB Schenker station to/from Australia/New Zealand

Special challenges call for special services:

DB SCHENKERdirect down under

In addition to our products, we have a unique dedicated 'Direct Down Under' air link from the manufacturing heart of the USA to Australia. This freighter operation service offers rapid connections to New Zealand and has recently celebrated its 10th anniversary.

DB SCHENKERSkybridge

DB Schenker's multi-modal transport system - our network of global gateways and a worldwide sailing schedule combines the advantages of ocean and air freight. Transit times are reduced by 50%, with no peak season backlogs.

DB SCHENKERaeroparts

Offers the most comprehensive range of Logistics and Transport services including:

- Global coverage with Regional and Local expertise
- Dedicated Aerospace specialists around the world
- Strategic Aircraft On Ground Desks worldwide offering full 24/7/365 coverage
- Time Definite Multimodal Transport services for Critical and Routine shipments
- Supply Chain Management solutions customised to fit your requirements
- Comprehensive online information systems
 - Global Track & Trace
 - Pro-Active AOG monitoring
 - Complete visibility of the Repair Management loop
 - Warehouse Management Systems for global inventory visibility

DB SCHENKERmarineparts

The supply of spare parts worldwide for ship owners, fleet management, manufacturers of spare parts, shipyards, shipbuilders and repair companies.

Supply Chain Management (SCM)

For your complex supply chain needs, we offer comprehensive support services in the global exchange of goods - not only in land, air and ocean freight operations, but also in all the associated logistics services including warehousing and value-added activities.

We can help you prepare for growth

DB Schenker leverages its local and international knowledge and vertical market experience to review your existing supply chain. We identify areas of improvement with cost and time efficiency in your design to better meet the current and future requirements of your business.

DB Schenker's SCM services include:

DB SCHENKER^{scm} diagnostics

Global consulting services which include analysis of supply chains, organisational alignment workshops and, supply chain modelling and design.

DB SCHENKER^{source}

Customised solutions to effectively manage your product collection and deliver to manufacturer. Services include procurement management, local warehouse receipt, product count and quality checking, product rework for domestic markets and vendor/supplier managed inventory programs.

DB SCHENKER^{distribution}

Effectively manages your supply chain design through global and local capabilities. DB Schenker encompasses the entire supply chain from manufacturer to end user. The solution leverages our sophisticated international and domestic transport capabilities with dynamic inventory positioning and management to implement a cost-effective global supply chain, ensuring on-time product supply to your customer.

Supply Chain Visibility

DB Schenker's services can span the entire supply chain from manufacturer to your end user. Through central management of all these services, DB Schenker can provide you with full visibility of key milestones throughout the supply chain.

Domestic Supply Chain Visibility

In Australia our sophisticated warehouse management systems offer fully integrated EDI interfaces; simple, low cost, real-time online web performance and inventory reporting. This provides you with full visibility of key delivery milestones including receipt of product into warehouse, inventory at each warehouse, order receipt, order despatch and order delivery via electronic Confirmation of Delivery (COD) and paper based Proof of Delivery (POD).

IT Solutions / Visibility

Our IT solutions include a global freight management system, a sophisticated warehouse management system and a transport management system. Together our systems provide internal and external visibility of shipment and order status, inventory balances and proof of delivery throughout the whole supply chain.

DB Schenker offers value-added IT services geared towards providing total supply chain solutions for the market in Australia and New Zealand.

DB Schenker's integrated data network

DB Schenker computing systems are connected globally via SWORD (Schenker Worldwide Online Real time Data Network).

Customer Connections

The SWORD network is used as a gateway to send and receive customer information in any customer required message format.

Third Party Connections

Links to airlines and shipping lines, Australian Customs, New Zealand Customs, airports, seaports and trucking companies – enabling end-to-end visibility of shipment status.

IT Solutions

Our IT professionals offer consulting services and implementation of innovative IT solutions which improve visibility, productivity and effectiveness throughout the supply chain.

Today, we already shape the systems and applications that meet your demands in the future.

IT Services include the following:

- Freight Management System
- Warehouse Management System
- Transport Management System
- EDI Message Gateway
- EDI Invoicing
- Electronic Management and Status Reports
- Online Shipment Tracking
- Online Documents
- Online SLI (Shipper's Letter of Instruction)
- Landed Costing
- Costing Estimates
- Extensive Shipment & Reporting
- FCL Delivery Management System
- Purchase Order Management System

Domestic Warehousing

Providing visibility, velocity and control defines DB Schenker's domestic warehouse services. DB Schenker warehouse services are supported by over twelve locations and over 120,000 sqm throughout Australia and New Zealand, offering customised solutions to help optimise logistics processes.

DB SCHENKERwarehousing plus

Whether as a stand-alone requirement or as an integrated part of a domestic / global supply chain, DB Schenker can tailor a solution that fits your needs. Our warehouse management systems' structure is fully scalable allowing flexibility in:

- Fast receipt & put-away providing quick stock access & container turn-around
- Customised storage locations to match your specific storage requirements including block stack, pallet, cartons as well as flexible security & climate control capabilities
- National inventory control including cycle counting & inventory reporting to ensure stock accuracy
- Flexible & timely order fulfilment supporting split case units, cartons, & pallet pick as well as retail SSCC / scan pack labelling
- Product kitting, bundling, rework capabilities & returns management
- Sophisticated warehouse management systems offering fully integrated EDI interfaces; simple, low cost, real-time online web performance and inventory reporting

DB SCHENKERvalue-added services

For your complex supply chain requirements, DB Schenker provides various value-added services including but not limited to: 24/7 call centre support, product re-configuration, postponement services, standard or urgent special request and more. We have the professional teams ready for delivering the services you need, and for solving the problems you may have.

DB SCHENKERreverse logistics

We manage all aspects of the reverse flow of materials including RMA management, returns transportation management, coordination of repair, certification of disposal, and supplier returns management. DB Schenker can handle your business flow.

DB SCHENKERspares logistics

For complex spare parts inventory from computer chips to car doors, DB Schenker has the expertise. With fulfilment of spare parts orders including overnight deliveries to field technicians, control and replenishment of just-in-case (JIC) inventories at distribution centres and spares depots, our spares logistics capabilities fulfil customer requirements. This service can also be extended to manage the reverse flow of used parts to ensure environmentally friendly disposal.
